

**PROJECT PLAN: (ONLINE USED BOOKS STORE)**  
**(N.KRANTHI KUMAR)**

## **1.Introduction**

I'm Kranthi Kumar.I am going to develop a platform like as Filpkart,Amazon.....My passion project is Online usedbooks(2ndhand books) store,the name itself describes that and Additionally, I am thinking to make availability of A to Z E-books in this platform.

## **2.Overview**

I'm going to create this platform for the students who are from poor background.For example,If a book costs Rs.1000.Through my platform I will reduce the price upto 40-50% off by comparing to original cost of that book.

Actually,I want to share that“How this idea came into my mind”?

When I'm studying my +2,I want to buy a book regarding to my course,But I didn't find that book in my city.Then I went to the “2nd HAND BOOK STORE” which is there in my city.There I found that book with 40% off.Then I thought that if i made this thing like ONLINE.What happens?

### **2.1 Customers**

College Students.

### **2.2.Functionality**

- 1.I will setup a mail server for loginid/signup.
  - 2.Then a user enters into the site,checks the item(book) which he wants and add to cart.
  - 3.From cart,He/She goes to the payment part,in there are two modes of transactions
    - A.CASH ON DELIVERY.
    - B.ONLINE PAYMENT.
- He/She selects whatever mode they want.

**IMP NOTE:-** If a User didn't got a book which he wants .This question arises in my mind?

I think a lot for this question.Finally I got a solution for this.In my platform I will arrange a part like,Where user can posts that which book he needs?If that book is available in my store,I will inform him through Mail Or Sms.

### **2.3 Platform**

Front-End : HTML,CSS,JAVASCRIPT,BOOTSTRAP.  
Back-End : PHP/JAVA,MACHINE LEARNING.  
Data access : MYSQL.

These requirements are required to bulid this platform.I am still counting.....

### **2.4 Development Responsibility**

The Complete responsibility is mine.I will develop this by sole.

### 3 Goals and Scope

My goal to help the students through my platform.

### 4 Deliverables

Milestone	Due Date	Release	Deliverable?
Prototype	25/10/2015	Pre-Beta	Yes
First phase of site	10/11/2015	Pre-Beta	Yes
Second phase of site	25/11/2015	Beta	Yes
Final phase of site	10/12/2015	Final	Yes

### 5 Risk Management

#### 5.1 Risk Identification

#### 5.2 Risk Mitigation

### 6 Scheduling and Estimates

Milestone	Due Date	Release	Deliverable?
Prototype	25/10/2015	Pre-Beta	Yes
First phase of site	10/11/2015	Pre-Beta	Yes
Second phase of site	25/11/2015	Beta	Yes
Final phase of site	10/12/2015	Final	Yes

### 7 Technical Process

I am studying back-end part programming languages like php and machine learning. Once I will make myself details are clarity and then I will start coding.....:-)
